

Circular 26/001: ICE TitleDocs Solution is Compliant with the Maritime Code of the People's Republic of China (2025 Revision)

Reference is made to Circulars issued by the 12 members of the International Group of P&I Clubs (a sample can be found [here](#)), pursuant to which the Clubs approved the ICE Access Agreement 2023.1 for local law governed electronic bills of lading ("**ICE eBLs**").

Pursuant to this approval, parties can use ICE Local Law eBLs in cases where i) the eBL is subject to a law that recognises that eBLs are the legal equivalent of paper bills of lading; and ii) ICE has issued a circular notifying users accordingly.

The purpose of this Circular is to advise all TitleDocs Solution Users that the Title Docs Solution is Compliant with the Maritime Code of the People's Republic of China (2025 Revision). Users can now access the TitleDocs Solution to manage TitleDocs which are governed by Chinese law.

Yours faithfully
